What will I know and be doing at the end of this unit?

- Know that I can ask a question to find out things
- Ask 'how' and 'why' questions about my experiences and in response to events
- Talk about and ask questions about aspects of the place I live and the natural world
- Talk about some of the things I have observed such as plants, animals, natural and found objects
- Show care and concern for living things and the environment
- Make observations of animals and plants and explain why some things happen and talk about changes
- Understand that we must care for the world
- Know about some of the things that live under the sea
